Nebraskans deserve better dental care. Support LB639 to deliver transparency, accountability, and value for working families across the state.

Insurance Must Put Patients Over Profits Our Guiding Values

More Transparency

Insurers must report how your premium dollars are spent, ensuring you're informed about where your money goes.

More Accountability

Dental plan carriers should be held responsible for how they spend your money. LB639 requires at least 85% of premiums to be spent on patient care and quality improvements, or else patients get a refund.

More Value for Patients

LB639 guarantees that your hard-earned money directly benefits your oral health, not corporate profits.

Help Nebraska families get the dental benefits they deserve.

More for Your Smile is a coalition of patients, dentists and oral health advocates who want to improve dental insurance benefits in Nebraska through **more transparency, more accountability, and more value for patients.**
